HOTEL IPTV range

IPTV protocol

Four stripes range TV fully supports IPTV protocols and all related advantageous, most of these are: Stability of transmission, a wide support of various contents and a strong flexibility in visualising. Thanks to IPTV protocol, all information are supplied by a central server among a high speed broadband LAN that grants stability and a high quality service. The TV becomes then part of the IP infrastructure with a direct access to all new technologies IP-based, like: Voice-over-IP (Skype), Video-over-IP, Video on Demand, streaming Video, bidirectional messages, store on line, all immediately available to end user.

HOTEL IPTV range

A direct integration
Four stripes IPTV range integrates directly inside the TV the IPTV handling process.
No need of external device.
Connections to the external are minimised allowing a considerable safety optimisation of maintenance and support.

Four Stripes IPTV is fully handled by remote.
Each TV can be easily controlled by central servers allowing a good security access.
Maintenance becomes then very easy and powerful with a wide level of scheduling contents to be showed.

Four stripes TV combined with a software IPTV grants the best visualising information available nowadays, like national channels, or international ones, hotel info channels, Radio, Music, Video on demands and internet access.

Technical Specifications

Tecnology: LCD TFT
Dimensions: 32" - 42"
Aspect Ratio: 16:9
Native Resolution: 1920x1080 FHD
Colours: 16 M
Brightness: up to 600 cd/mq
Contrast: up to 4000 :1
Viewing angle: 178° in all directions
Orientable: vertical (portrait) horizontal (landscape)
Response time: <6 ms

Video interface: DVI/VGA/HDMI (internal connection)
Control: Serial port (Dsub 9 pin) (internal connection) (optional)
IR remote control
Standby handling: through DPMS
External connectors: LAN and maintenance connector
Audio: Sound system with internal 3 ways 10W stereo speakers
High level Output for additional external speakers

Control board format: Mini -ITX
CPU: Intel Atom based
RAM: 2 GB DDR2
Memory (non volatile): Solid state HD/CF industrial up to 16 GB
Graphic: Nvidia ION, resolution up to 1920x1080 pixel
LAN: Gigaethernet 10/100/1000

Interaction for maintenance: Special connector USB

Working Temperature range: +5°/+40°C
Working humidity range: 10-90% (w/out condense)
Dimensions: 815x518x103 (32" w/out base)
815x590x103 (32" with base)
1034x647x102 (42" w/out base)
1034x701x102 (42" with base)
Weight: 23 kg (32 with base)
38 kg (42" with base)

Power: 220-240 v
Accessories: Power cable
IR remote control with batteries
User manual
Adaptor for power
